SUMMARY

Detail-oriented and passionate Web Developer with hands-on experience in building responsive and dynamic web applications using React.js, Node.js, TypeScript, and Tailwind CSS. Skilled in designing user-friendly interfaces, integrating APIs, and developing scalable backend services. Proficient in using RESTful APIs, and modern development tools. Strong problem-solving abilities with a focus on clean, maintainable code and a commitment to continuous learning.

WORK EXPERIENCE

Techriigour IT Solution Pvt Ltd, Pune   **June 2024 to Present**
Software Engineer

- **Backend Development:** Built and maintained scalable RESTful APIs using Node.js and Express for a VRetail Application and Retail Admin portal. Integrated databases, implemented file handling, and optimized performance for improved system efficiency.

- **Frontend Development:** Developed and optimized UI components for key modules such as Vendor Management, Billing using React and Tailwind. Implemented dynamic forms, table views, search functionalities, and responsive layouts to enhance user experience across VRetail Application.

Techview Infotech Pvt Ltd, Pune   **Nov 2023 – Jan 2024**

Software Engineer (Intern)
- **Frontend Development:** Gained hands-on experience with HTML5, CSS3, and Bootstrap during an internship, creating responsive and visually appealing web interfaces. Led a team in designing and developing a user-friendly UI for a car and bike rental website.

PROJECTS

AuraNest - An ECommerce Website   ⭘ Github

- An e-commerce website built with TypeScript, React, and Tailwind CSS.
- Integrated Axios with open APIs to fetch products, top sellers, and blog data.
- Utilized useEffect and useContext for state management and dynamic rendering.
- Live Demo : AuraNest

TusharEstate – An online platform for buying, selling, and renting properties.   ⭘ Github

- A full-stack real estate website built using React.js, Node.js, Socket.IO, Tailwind CSS, and Redux. Implemented features for property listing, including viewing, adding, updating, and deleting property details.
- Integrated Google Authentication via Firebase to enhance user privacy and security.
- Enabled real-time updates and interactions using Socket.IO.

Amazon Clone (UI) – A static clone of Amazon.com replicating its simplicity Github

- Created a familiar interface with curated product listings to mirror the user experience of the original platform.
- Designed and developed using JavaScript, HTML, and CSS.
- Live Demo: [Amazon Clone](#)

Giggle (Chat Application) – A real-time chat application for instant messaging. Github

- Enabled users to join chat rooms and exchange messages in real time with Socket.IO integration.
- Features include a clean interface, emoji support, and message timestamps for an enhanced user experience.
- Built using React.js, Node.js, Socket.IO, and Tailwind CSS for a responsive and interactive design.

News API Github

- Developed a responsive news web app using JavaScript, HTML, and CSS
- Implemented a keyword-based search feature to fetch and display news articles from multiple sources using News API.
- Designed for a seamless user experience across devices with a fully responsive layout.
