

TUSHAR THARWANI

Software Engineer | Next.js | Node.js | TypeScript | Prisma | Redis

Pune | +91 9527921209 | tharwanitushar19@gmail.com | [Github](#) | [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Software Engineer with 2.4 years of experience building scalable full-stack applications using Next.js, React.js, Node.js, Prisma, Supabase, and MongoDB. Experienced in handling frontend, backend, database design, authentication, and deployment workflows for production-grade applications. Skilled in AI-assisted development tools, Redis caching, and generative AI integrations using RAG architecture, with a strong focus on scalable and maintainable systems.

WORK EXPERIENCE

Full Stack Developer — Siox Global LLC.

Dec 2025 - Present

- Contributed to the development and enhancement of centralized multi-tenant enterprise platform spanning **7 business domains**: SaaS, Hospitality, IT, Freight, Holdings, Admin, and BPO.
- Delivered **20+ end-to-end features** and completed **13+ enhancements and production fixes** across dashboards, KPI analytics, employee workflows, ticketing, EOD reporting, subscriptions, and business operations.
- Built secure REST APIs and Prisma data models across **20+ end-to-end features**, implementing RBAC, database workflows, cron jobs, and email automation from development through production support.
- Integrated **RingCentral and Keka HRIS**, implementing **8+ integration workflows** for communication, employee management, and operational processes.
- Implemented and managed ~14 cron jobs** for automated background processing, notifications, synchronization, and recurring business workflows.
- Improved PostgreSQL connection management by implementing a shared connection pooler, reducing observed connection usage from 59–60 to 19–25 out of 60 available connections.

Tech Stack: Next.js, TypeScript, Prisma, Supabase, PostgreSQL, Tailwind CSS, REST APIs, Cron Jobs, RingCentral, Keka HRIS

Software Engineer — Techriigour IT Solutions Pvt. Ltd.

Jun 2024 - Dec 2025

- Contributed to 7 of 9 VRetail modules, including end-to-end ownership of Vendor and backend development for Purchase Orders, Purchase Returns, and post-sale product returns.
- Refined the Inventory module and Analysis dashboard with **5+ sales and product analytics charts** covering daily, weekly, monthly, and yearly sales and top-selling products; contributed to Billing across frontend and backend.
- Developed approximately 90% of the VRetail Admin Portal, implementing Salesperson and User management workflows with secure REST APIs, JWT authentication, RBAC, and database models.
- Built B2B Surge, a responsive static corporate website using Next.js and reusable UI components, while collaborating on API integration, bug fixes, and Agile development practices.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Next.js, JWT, Tailwind CSS

Software Engineer Intern — Techview Infotech Pvt. Ltd.

Nov 2023 – Jan 2024

- Built responsive, cross-browser-compatible UIs using HTML5, CSS3, and Bootstrap, improving mobile usability.
- Coordinated a 7-member intern team by planning tasks, assigning work, and organizing team workflows to support timely milestone delivery.
- Tech Stack:** HTML5, CSS3, JavaScript, Bootstrap, Git, Agile Methodologies.

PROJECTS

FindStay — Full Stack Real Estate Platform

Github

- Engineered a full-stack **real estate platform** using the **MERN stack** and **TypeScript**, featuring property listing, buying, renting, advanced search, filtering, sorting, pagination, and role-based user management.
- Integrated secure **Google OAuth** with Firebase and JWT-based backend authorization for seamless user onboarding and access control.
- Improved application performance by integrating **Redis caching** and **React Query**, reducing redundant API requests and delivering a faster, more responsive user experience.
- Integrated **Google Gemini AI** with **RAG architecture** to power an intelligent chatbot and AI-assisted property description generation with context-aware responses.
- Developed a comprehensive **Admin Portal** for managing listings, users, home tour bookings, AI usage analytics, and platform operations through secure REST APIs.
- Enhanced user experience with **Google Maps integration**, live directions, and location previews for interactive property exploration.

Live Demo: <https://findstayy.vercel.app/>

SKILLS

- **Languages:** JavaScript (ES6+), TypeScript
- **Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication
- **Database & ORM:** MongoDB, MySQL, PostgreSQL, Prisma, Supabase
- **Caching & State Management:** Redis, React Query, Redux
- **Tools & Platforms:** Git, GitHub, Postman, Vercel, Netlify, Render, Cursor AI
- **Concepts:** OOP, Caching, API Design, RBAC, Agile Methodologies, AI Integration, Generative AI, RAG Architecture

EDUCATION

BBA (Computer Applications)

2021 – 2024

Pratibha College of Commerce & Computer Studies (SPPU)

- CGPA: 8.44 (A+)

HSC

2019 – 2021

Jai Hind Junior College

- Percentage: 80.66%
